

GROW LIGHT SOLUTIONS

THE POWER OF LIGHT

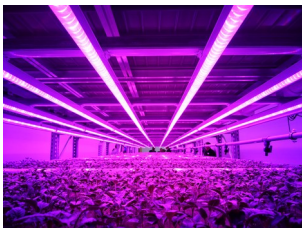

Cultivate success with Horticultural Grow Lights.

Lighting is pivotal in controlled-environment agriculture, and our smart solutions thrive in both indoor and greenhouse settings.

As horticulture evolves rapidly, so does lighting. so does our lighting technology. Shift away from energy-intensive HPS solutions to our eco-friendly LED options—Top Lighting for greenhouses, Intrac canopy LEDs elevating yields, and Multi-layer solutions for vertical farms.

Tailor your spectrum from Purple to White, customizing light recipes for optimal crop growth.

Our turnkey solutions, spanning Europe and EurAsia, empower grower companies and research organizations to achieve remarkable results. Join us on a journey of precision, performance, and global excellence in tissue culture.
